

# SERIES PACKAGE

## POLY-THERM™ PRE-INSULATED PIPE SYSTEM

For long-term quality and performance end-to-end results in hot or chilled applications, POLY-THERM insulation is your solution. Please visit our website for more information and technical parameters.

INSULATION	PREMIER ENGINEERED
<b>Piping Features</b>	
Anti-Corrosion Coating	✓
Aluminum Diffusion Barrier	✓
Fiberglass Reinforced Polymer Outer Jacket	✓
PermAlert™ Leak Detection	✓
Polyurethane Foam Density Engineered To Meet Project Requirements	✓
Various Carrier Pipe Materials Available – Carbon Steel, Stainless Steel, Copper, or HDPE	✓
<b>Piping Services</b>	
Engineering Support - Heat Loss & Heat Gain Calculations - Stress Analysis Calculations - Finite Element Analysis Calculations - Fabrication Drawings - Pipeline Support Load Calculations	✓
Fabrication Capabilities - Bends, Elbows, and Fittings	✓
Field Joint Kits - Heat Shrink Sleeves, Air Testable Field Joint, and Insulated Field Joint Kits	✓
<b>PARTNERS IN EXCELLENCE Difference</b>	
Lasting value and end-to-end engineered solutions for specific customer challenges	✓
Superior customer & technical support when you need us the most	✓
Fast delivery, reliability, and efficiency to meet your project deadline	✓
Large diameter capabilities	✓
Customized fabricated shapes and fittings	✓
World-class safety performance at strategic manufacturing locations worldwide	✓
ISO certifications to ensure consistent, high-quality products and services	✓
Over 100 years of manufacturing excellence, high quality, reliable products and services	✓
